Environmental Management Accounting and Supply Chain Management

This volume's focus on the environmental accounting of supply chain processes is of particular relevance because these processes supply data about the environmental impact of relationships between business organisations, an area where the boundary separating internal and external accounting is ill-defined. Here, contributors advocate what they term 'accounting for cooperation' as a more environmentally positive complement to the paradigmatic practice of 'accounting for competition'.... more on <http://springer.com/978-94-007-1389-5>

► Provides latest research in environmental management accounting; Addresses supply chain management issues which are of growing global significance; Includes papers presented during the first EMAN global conference in South Africa in 2007 and the EMAN-EU conference held in Hungary 2008
